# STANLEY®

## DESIGNED FOR THE PROFESSIONAL

Since 1843 STANLEY has built a global reputation for quality and reliability, the iconic STANLEY name has been recognised as a trusted provider of tools to both the professional and retail consumer alike.

The brand's global heritage is based on firm foundations of dependability, reliability and innovation. Now with the launch of STANLEY workwear the same standards of quality, durability and performance that our customers demand from our tools can be found in our clothing.

With an uncompromising attitude to quality the range of good looking functional workwear, socks and knee pads produced using premium fabrics and trims, offers protection, performance and comfort in all conditions.

- 100% Brushed cotton
- One size fits all

# "STRUCTURALLY ENGINEERED SUSPENSION SYSTEM FOR THE KNEE"

## ULTRA KNEE PAD

This scientifically proven technology stemmed from the recognition that there was a need to invent a new kneepad, which pays attention to the direction of force transmitted to the knee, something that foam knee pads struggle to achieve.

Unlike foam, which works by compression, this patented leaf-spring technology works by flex distributing point pressure and reducing shear force thereby evenly dissipating weight when kneeling. This protects the body by cushioning the knees from impact forces caused by continuous kneeling.

- Fits pocketed work trousers
- 100% Recyclable
- Patented Leaf-spring technology
- Curved to fit around knee
- Waterproof & machine washable
- Reduces point pressure
- Distributes weight
- Penetration protection CE EN 14404 type 2 level 1
- Protection from hot & cold surfaces
- Maintains 100% support

Utilising an advanced award winning cushioning structure, which protects the body, prevents injury and reduces down time and significantly reduces capital expenditure in an ever growing number of large corporations across the globe.
